Pansies

Let your slogan be, "Plant Plenty of Better Pansy Seed"

Every flower lover has a warm spot in his heart for pansies so, therefore, we are offering to lovers of extra fine pansies—Mastodon Masterpiece mixed pansy seed, Steele's super mixture strain, his masterpiece in pansy perfection in size and quality, contains all the finest types and latest novelties including ruffled. In colors, white, dark center, dark blue center and light blue center, pure white, black, burgundy red, lavender, violet, light blue, bronze, royal purple, rose, cerise red, red with silver rim, mahogany, yellow, wine color, henna, red and gold, lavender and gold, and in size measuring up to three and seven-eighths inches in diameter, long stems, hardy and best for cut flowers.

Packet 300 seeds, 50c; 3 packets, \$1.25 postpaid.

Cultural Directions

In most climates best results are obtained by planting seed the latter part of August or early September. Sow the seeds thinly in well drained flats and just barely cover the seed with sifted dirt. They must be kept moist but not too wet. During the hot mid-day sunshine cover the flats with newspapers or a cloth frame. Transplant when the seedlings have three or four leaves if weather conditions are favorable. In some places they will need protection of cold frames, but pansies will stand even some zero weather if protected by straw.

Hybrid Delphiniums (Perennials)

We are offering a mixture of Burbank's and Diener's hollyhock strain of hybrid delphinium seeds, colors of blues from the delicate sky to the deepest indigo and from the palest mauve to the darkest purple and in single and double flowers.

Packet over 100 seeds, 35c; 3 packets, \$1.00 postpaid.

Wrexham Strain Delphiniums

Have splendidly shaped tall spikes, some 7 to 8 feet high, with wonderfully large individual flowers of the richest and most unusual shades. Considered the finest delphinium hybrid strain grown and originated by Watkin Samuel in Wrexham, Wales. We are offering seeds grown in this country which we consider equal to the imported seed.

Packet over 100 seeds, \$1.50; 4 packets, \$5.50 postpaid.

Cultural Directions

Seeds sown in August or September will bloom early in the spring. Sow seeds same as for pansy seed.
